2.2 COLLECTING PAYMENT

EUROVENT CERTITA CERTIFICATION, mandated body, is empowered to collect all payments.

The applicant or the licensee shall settle these invoices under the prescribed conditions: any failure on the part of the licensee prevents EUROVENT CERTITA CERTIFICATION from exercising its inspection and operating responsibilities incumbent on it by virtue of these regulations.

In cases where an initial formal notice by registered letter with acknowledgment of receipt does not result in the payment of all sums due within one month, EUROVENT CERTITA CERTIFICATION may adopt conservatory measures regarding the right to use the NF Mark for all of the licensee's allowed products.

2.3. OBTAINING CERTIFICATION

The services payable for each factory include the examination of files, the audit and simulation or testing on samples taken during this audit.

The fee for examination of the application is paid as a single sum when the application is filed and covers its examination (for a production site), its presentation to the Mark Committee, and contribution to the general operation of the mark and to the right to use the NF Mark paid to AFNOR Certification.

The test fee is payable once the laboratory in charge of the tests is in possession of the samples.

No fees relating to examination of the application can be refunded, regardless of the result of the examination.

2.4. CERTIFIED PRODUCT SURVEILLANCE

Invoicing covers the right to use the NF Mark, passed on to AFNOR Certification, application follow-up, and the audit and tests carried out on samples during this audit.

If acceptance is granted during the course of the year, the amounts invoiced correspond to the services provided. Invoices for tests are sent once the laboratory in charge of the tests is in possession of the samples .

Following product certification, CERTITA invoices the licensee the right to use the NF Mark on an annual basis and paid to AFNOR Certification. This license fee is included in these rates.

This licence fee is intended to cover:

- general operation of the NF Mark (organisation of quality assurance, monitoring of bodies in the NF network, management of the certification committee),
- defence of the NF Mark: filing and protecting the mark, legal advice, processing of appeals, legal fees,
- contribution to the general promotion of the NF Mark.

The fee for following up the application cannot be refunded even if a decision is made to withdraw the right of use.

2.5. ADDITIONAL VERIFICATIONS

Costs resulting from additional audits or tests are payable by the manufacturer, regardless of the results.

Additional examination of the application is also invoiced for the processing of inadequacies or anomalies observed by EUROVENT CERTITA CERTIFICATION or following sanctions proposed by the committee.

Inspections continue and the corresponding fees continue to be charged for as long as stocks of NF-marked products remain on the licensee's premises.
